ZOLL AED 3

(analyses and delivers a shock in 4 seconds !!!!)

Introducing a new defibrillation platform for professional rescuers that builds on our reputation for providing rescuers with unmatched support plus a low total cost of ownership.

The AED 3 takes the best support for rescuers during a rescue to the next level with:

- Real CPR Help that can see your chest compressions during CPR to let you know, in adult rescue mode, when you're doing high-quality.
- CPR at a rate of at least 100 compressions per minute and 5 to 6cm deep for adults.
- CPR Dashboard with compression rate and depth, CPR cycle countdown timer, shock count and total elapsed time.
- Shock delivery 4 seconds after stopping CPR, for a more effective shock.
- Universal CPR Uni-padz for push-button selection of adult or child rescue.
- Reviewable clinical event data showing key statistics, along with ECG and matching chest compressions.

\$145.00 (GST excl.)

Handy Personal First Aid Bag (3 only)

Survival Handy/Personal Kit. Great quality with well laid out labelled compartment for quick retrieval.

Contents not included

\$59.00 (GST excl.)

ZOLL AutoPulse Mechanical Compression Device (complete package)

ZOLL AutoPulse® (complete package) offers consistent, uninterrupted compressions during Cardiac Arrest.

The ZOLL AutoPulse® used to provide CPR, is an automated, portable device with an easy-to-use, load-distributing LifeBand® that squeezes the entire chest, improving blood flow to the heart and brain during resuscitation. It may offer a significant advantage over manual CPR, moving blood more consistently than human providers.

The AutoPulse also minimises time where compressions are not traditionally received, such as during transporting or while changing tiring rescuers. Additionally, it offers the benefit of freeing up clinicians to focus on other life-saving interventions.

\$9,500.00 (GST excl.)

New Price \$ 25,000.00

Manually Triggered Demand/Ventilator Valve w/- oxygen hose & hand wheel (10 only)

The EMT Ventilator is designed to flow at UP TO 40 litres per minute during the manually-triggered mode. During spontaneous breathing, the unit functions to provide minimal work of breathing for the patient with a low initial opening pressure providing gas flow as high as 115 litres per minute with pressure limited to 6cm H2O. If ever a blockage causes the airway pressure to rise the unit offers a superior function of immediately cutting gas flow, allowing immediate exhalation and depressurisation of the airway. Most other demand valves trigger a warning but do not release the causative agent, the pressure.

\$250.00 (GST excl.)

Triage (Multiple Casualty Incidents) Sort Mats

Triage Sieve and Sort Mats. Made from heavy duty vinyl. Set of 3. Colours: *Green, Yellow and Red.*

Suitable for Triage exercises, real or drills. Each mat measures: 30 x 30 x 30cm. Comes in easy to carry case

**2 units available
\$250.00 (GST excl.)**

CT6 Traction Splint (2 only)

A Splint to solve your leg traction needs in a small half kilogram bag. Entire splint, and ankle hitch, are designed to fit Adult through Paediatric patients. Integral Reflective Strap System; comes out of the bag ready to go, no loose straps. Requires minimal patient movement with no Perineal nerve impingement. Tested extensively in the field by numerous organisations through numerous areas of the world.

\$ 195.00 (GST excl.)

Usually \$ 350.00

Intubation Kit Bag (3 only)

This kit bag with internal pockets, velcro straps and elastic loops to organise all your intubation equipment. This is a very well organised kit, which is roomy enough for all your airways, laryngoscopes and Magills forceps. Designed to fit in main pocket of a Large Medical Trauma Bag.
